

SOLOVERSE [UNIVERSAL GAME NOTES]

[Ages 7+, 3-10 Players]

CONTENTS:

- [FIRST PLAY RECOMMENDATIONS](#)
- [IMPORTANT NOTES](#)
- [TURN OVERVIEW DEFINITIONS](#)

FIRST PLAY RECOMMENDATIONS:

1. For new Players only use the **Core Game** Cards for a best First Play Experience.
2. Next, if you own the **Core Extension**, know that while it isn't advised to use these Cards during someone's First Play, the following Limited Selection of Cards could be added if desired:
 - All **Orange Number & Action Class Cards**. Some Wild Card's Icons [such as **Discard Colour**] can become confusing if a Colour is missing; so, while I would not recommend using these to start with, if this confusion does become an issue, feel free to add them in.
 - Some Wild Cards from the **Core Extension** you might also consider using are: **Badge Collector** [x 2], **Black Hole**, **Paradigm Shift**, **United We Fall**, **Vaccine** & **White Hole**.
NOTE: These Wild Cards are far simpler than most in the **Core Extension**, and therefore can be easier to use.
3. It also isn't advised to use any of the Optional Expansion Packs for your first few games.
 - For the most part, **Expansions** are more complicated than those included in the **Core Game**, excluding them keeps things simple while the new Players get the hang of things.
4. Once everyone has got a feel for the game you may up the action with the complete **Core Extension**.
5. Then the next step as you get accustomed to the game play is going all out with a couple of **Expansions**. Speaking of which, the first one I would especially recommend adding is the Fan Favourite: **Apocalypse Expansion**.

IMPORTANT NOTES:

1. Never Re-Shuffle the Discards into the Deck as this has the potential for the game to not end.
 - If the Deck runs out of Drawable Cards, the Game Ends and everyone loses! [see: **VICTORY CONDITIONS: RULE 5**].
TIP: "The **Recycle** Wild Card from the **Core Extension** can give you options here."
2. There is a difference between **Deal Effects** and **Draw Effects**:
 - All **Deal Effects** [including the initial Deal] ignore all Trap Effects [return them to the Deck if Revealed].
 - All **Draw Effects** follow Trap Effects.

3. In some cases, Card Effects can Override and/or Delay others.

- When this happens, the last Card Always takes Priority.

EXAMPLES:

- If the **Stun** Wild Card is in play and **Vaccine** is played, the **Stun** Wild Card cannot Deactivate *[and Stun its target's turn]* until **Vaccine** has finished.
- If the **Vaccine** Wild Card is in play and its User's turn is Skipped, the **Vaccine** Wild Card cannot Deactivate *[allowing Wild Cards to be played/activated again]* due to its User not having a Playable Turn that round.

4. Playable Turn Notes:

- A Playable Turn describes a Turn that the Player can choose for themselves what Card to play.
- A Playable Turn does not describe a Turn where a Player is facing Card Effects.

EXAMPLE: Such as having their Turn Skipped or needing to Respond in Kind to Stacked Draw Effects.

5. Turn Order x Discard Timing:

- It is important to follow the Turn Order when such events like Group Discarding occurs.

EXAMPLES:

- Playing the **Discard Wilds** Wild Card when you only have Wild Cards left and you *expect* to win. Technically, in most cases, the User is *last* to Discard. Meaning, another Player could Discard their Wild Cards and beat you to the Win.

TIP: "Unless someone else who hasn't had to Discard yet still has an **Anti-Fun Wild Card**."

- Wild Cards that force all Players to Group Discard 1 more Cards. Observing the Turn Order grants the last Player *[in most cases the User]* the advantage to choose the Card that continues play.

6. Trap Class Wild Card Notes:

- All are Dual-Sided and therefore appear *Face-Up* in the Deck when Shuffled.
- When revealed, remove it from the Deck temporarily and follow its Effects.
- All are Reshuffled back into the Deck after all Effects have been resolved.
- If any are revealed while Dealing *[including during the initial Flip to form the Discards]*, return them randomly to the Deck.
- Some have Instant Effects that can be actioned upon without removing it from the Deck first *[e.g.: **Mercy**]* and therefore prevent additional Trap Class Wild Cards from being Activated.
- **All Trap Class Wild Cards CANNOT be Countered, unless specified *[including Trap Class Wild Cards from Expansions]*.**

7. Multiple Trap Class Wild Card Activations:

- If multiple Trap Class Wild Cards are triggered during Drawing, place the latest Trap Class Wild Card on top of the previous and complete its Effects first.
- Place each Trap Class Wild Card in a separate “used pile” as their Effects are finalised before returning to the previous Trap Class Wild Card.
- Then Shuffle all Trap Class Wild Cards back into the Deck once all Effects have been finalised.

8. Some Cards have Secondary Effect Icons:

- Their details will list these Effects First, in Order of Priority and Second, in the Order they Happen.

EXAMPLE: In the case of the **Wild Draw +4 Reverse** Wild Card, the Draw +4 Effect is the Primary Effect, while the Reverse Effect happens first.

- After the Direction of Play Reverses, the previous Player must deal with the Primary Draw Effect by Drawing or Responding in Kind.
- However, once the Primary Draw Effect has been resolved, the next Player can act upon the Secondary Reverse Effect.

EXAMPLE: Even if the **Wild Draw +4 Reverse** was called Blue, the next Player can play any Coloured Reverse.

9. Counter Class Wild Card Levels:

- Each Counter Class Wild Card will have its own Level [e.g.: Lv1, Lv3, etc].
- With some exceptions, any Counter Class Wild Card CAN be Countered back at you, IF the Responding Counter Class Wild Card is the Same Level or Higher.

EXAMPLE: Compare **NOU** [a Lv2 Counter Class Wild Card from the Core Game] and **NOT ME** [a Lv3 Counter Class Wild Card from the Core Extension].

- **NOT ME** [Lv3] CAN Counter Itself & **NOU** [Lv2].
- Whereas **NOU** [Lv2] CAN Counter Itself but CANNOT Counter **NOT ME** [Lv3].

- Keep in mind that there are **Specifically Countered** situations that contradict this **Important Note**.

EXAMPLE: **Anti-Fun** [a Level 1 Counter Class Wild Card from the Core Game]. Despite all other Counter Class Wild Cards having a higher Level, only **NOU** can Counter **Anti-Fun** if played as your last Card.

TURN OVERVIEW DEFINITIONS:

["These Turn Overview Definitions will almost never be needed, but in instances where disputes arise, they will come in Handy"].

OPENING PHASE:

Definition:

- After the previous Player's **End Phase**, but before your turn actually starts.

Required For:

1. Carry Over Effects:

- Some Card Effects Carry Over between Player's Turns and Activate during the **Opening Phase** of the next Player's Turn *["As in you face them before your turn actually starts"]*.

EXAMPLE: Draw +2 & Wild Draw +4 from the **Core Game**.

2. Activate Before Starting Your Turn:

- Certain Wild Cards activate in the **Opening Phase** if they state: **Activate before you start a Playable Turn**. Your turn's **Main Phase** only starts after such Wild Cards' Effects are activated.

EXAMPLE: A lot of **Expansion** Wild Cards use this Effect such as the Royal Knight Class **Jack's Knight** from the **Oblivion Expansion**. It changes the rules for your **Main Phase**, allowing 2 playable Cards to be played instead of just 1.

MAIN PHASE:

Definition:

- Basically, your actual Turn; the Card or Cards you play.

END PHASE:

Definition:

- The last step in your turn; it sits between your **Main Phase** and the next Player's **Opening Phase**.

Required For:

1. Effect Finalisation: The last step in your turn after playing a Card.

EXAMPLE: After activating a Wild Card, you will usually need to Choose a Colour to Continue, and this designates the start of your **End Phase**.

2. Victory Conditions: Victory Conditions are checked during this Phase.

EXAMPLES:

- The main **Victory Condition** is having No Cards Left [see: **VICTORY CONDITIONS: RULE 2**].
- If your last Card has a Draw Effect, Play continues until a Player *is forced to Draw*. [see: **VICTORY CONDITIONS: RULE 3**]. Until that happens, you cannot complete your **Victory Condition** of No Cards Left.

3. **Wild Card Activation:** "Most cards do not use this, but one does come to mind."

EXAMPLE: That example is the Counter Class Wild Card: **Anti-Fun**, from the **Core Game**. It is technically during your **End Phase**, in response to your **Victory Condition** of No Cards Left, that any Opponent can use it to force you to **Deal** 5 extra Cards to yourself. At this point, your **Victory Condition** checks for No Cards Left, finds Cards and cancels itself, completing your Turn's **End Phase**.

4. **Carry Over Effects:** Many Effects are forwarded onto the next Player's **Opening Phase** [see: **OPENING PHASE** above].
